## EDUCATION

---

Parul University  
B.Tech. Computer Science

Sep 2023 - Exp. 2026  
Vadodara, Gujarat

## CAREER

---

### Remote (UAE Clients) | Freelance

- Built production-grade e-commerce websites with respect to client requirements.
- Implemented SEO enhancements, CDN caching, and performance optimizations.
- Designed reliable architectures for long-term maintainability.

### Ascendtis IT Solutions | Fullstack Intern

Gujarat, IN | Jan, 2026 - Apr, 2026

- Built production-grade web applications for industry clients using ElysiaJS, Next.js, Type ORM and MySQL.
- Designed scalable & reliable solutions for growing client requirements.

### Arth Technology | PHP/MySQL Intern

Gujarat, IN | May, 2022 - Jun, 2022

- Built a backend system using phpMyAdmin for database management with basic HTML, CSS.
- Configured a local XAMPP environment to support and optimize the PHP and MySQL backend system.

## SKILLS

---

Languages: TypeScript, Rust, Go

Frameworks: ElectroBun, Electron, ElysiaJS, SvelteKit, Tanstack

Data: PostgreSQL, MySQL, Redis, Drizzle ORM

Tools: Linux, Docker, Git, Ableton Live, FL Studio, Figma, WordPress

## PROJECTS

---

### Grabbr | ElectroBun, FFmpeg & yt-dlp CLI, CI/CD, Svelte

- Built a cross-platform multi-media downloader app with granular download controls.
- Built a media processing pipeline with FFmpeg and yt-dlp integration for downloads.
- Designed an automated CI for auto build and release mechanisms.

MetaPress | ElysiaJS, SvelteKit, PostgreSQL (NeonDB), Redis (Upstash), Cloudinary (Images),  
Drizzle ORM, ONNX Runtime (WASM), Docker, ORPC, Logtape, etc.

- Integrated ONNX and Obscenity that automatically detects inappropriate content and filters profanity.
- Designed caching strategies using Redis for high scalability and performance.
- Built a content creation system with TipTap Editor (Notion-like) and Cloudinary for streamlined workflow.
